SOFT pearl **NEW**

PROPHYLAXIS POWDER FOR SUPRAGINGIVAL USE

SOFTpearl gently removes mild to medium discolorations in the supragingival area. The pleasant taste of Glycine avoids the addition of any flavorings. SOFTpearl is thus excellently suitable for children and people who suffer from allergies.

A mean particle size of 65 µm was chosen for SOFTpearl as this particle size is well suitable for removing light discolorations and thoroughly removing plaque. In addition, the particle geometry is homogeneous which particularly benefits gentle cleaning with a very even radiation energy of the tooth surface which supports for a nice and even result.

- 4x 250g bottles
- Ø Particle size: 65µm
- Application: supragingival
